Cover made from organic stretch knit cotton for maximum body conformation

Lined with pure Wool and Camel hair to optimize climate for deeper sleep

100% Natural Talalay - healthy and durable.

All components certified chemically safe by Oeko-Tex 100

Natural and luxurious

Our *Copenhagen* mattress combines a gently zoned Talalay core with a firm 2" base for stability and a 2" super-soft top layer which provides hips and shoulders with excellent contour and pressure relief.

The 6" zoned core is available in a choice of medium or firm to provide individual comfort for each sleeper.

Intentional in our approach, a 10" latex mattress made this way is the ultimate combination of luxurious cradling comfort coupled with superior ergonomic support and stability.

Cover lining of camel hair and wool

We complete our triple layer design with a stretch cover made from organic cotton quilted to our Plein-Air wool combined with a generous amount of camel hair. Camel hair is finer than sheep wool and performs exceptionally well with regards to humidity control and temperature balance in your sleep environment while providing sumptuous softness.

Chemically safe

Our *Copenhagen* is made entirely of 100% filler-free natural Talalay latex; not a blend of natural and synthetic latex. This means our latex cores are extremely durable and have an even density with outstanding durability.
